***Allowable Subject Matter***

2. Claims 2-26 are allowed.

Independent claims 5-8 and 16-17 recite "...identifying a macro-block as being associated with a blocking artifact; and mitigating the blocking artifact introduced through a compression operation by adjusting both a quantization parameter and an amount of bits generated from the quantization parameter, including applying an adjusted quantization parameter to a low activity compression block to limit a number of non-zero coefficients in the low activity block, and defining locations associated with non-zero coefficients of a high activity compression block according to the quantization parameter..." which are features that are not anticipated nor obvious over the art of record. Dependent claims 18-26 are allowed for the reasons concerning the independent claims. Also, since the Applicant has amended withdrawn claims 2-4 and 9-15 to depend from allowable elected independent claim 5, those claims have been rejoined to claim 5 and are allowable in accordance with the procedures set forth in MPEP 821.04 (a)-(b).

***Conclusion***
